AP Microeconomics Lesson Plan

36-session course framework and session design

18 weeks · 2 meetings per week · 90 minutes per meeting

English edition

Scope:	Units 1–6
Core outputs:	concepts, graphs, calculations, explanations, FRQ writing
Official map:	CED objective IDs and PDF page references
Repository:	`APMICRO-Lesson-Plan/`

5 Session-by-session design **2**

5.1 Session 1: Unit 1 – Scarcity and resource allocation . . . 3
5.2 Session 2: Unit 1 – Production possibilities curve . . . 3
5.3 Session 3: Unit 1 – Comparative advantage and trade . . . 3
5.4 Session 4: Unit 1 – Cost-benefit and marginal consumer choice . . . 3
5.5 Session 5: Unit 2 – Demand and supply . . . 3
5.6 Session 6: Unit 2 – Price elasticity of demand and supply . . . 4
5.7 Session 7: Unit 2 – Other elasticities and total revenue . . . 5
5.8 Session 8: Unit 2 – Market equilibrium and surplus . . . 5
5.9 Session 9: Unit 2 – Market disequilibrium and equilibrium changes . . . 5
5.10 Session 10: Unit 2 – Government intervention . . . 5
5.11 Session 11: Unit 2 – International trade and public policy . . . 5
5.12 Session 12: Unit 3 – The production function . . . 6
5.13 Session 13: Unit 3 – Short-run production costs . . . 7
5.14 Session 14: Unit 3 – Long-run costs and types of profit . . . 7
5.15 Session 15: Unit 3 – Profit maximization . . . 7
5.16 Session 16: Unit 3 – Produce, shut down, enter, or exit . . . 7
5.17 Session 17: Unit 3 – Perfect competition and review . . . 7
5.18 Session 18: Unit 4 – Introduction to imperfect competition . . . 8
5.19 Session 19: Unit 4 – Monopoly . . . 9
5.20 Session 20: Unit 4 – Price discrimination . . . 9
5.21 Session 21: Unit 4 – Monopolistic competition . . . 9
5.22 Session 22: Unit 4 – Oligopoly and game theory . . . 9
5.23 Session 23: Unit 4 – Market structure review . . . 9
5.24 Session 24: Unit 5 – Introduction to factor markets . . . 10
5.25 Session 25: Unit 5 – Changes in factor demand and factor supply . . . 11
5.26 Session 26: Unit 5 – Competitive factor markets . . . 11
5.27 Session 27: Unit 5 – Monopsony and review . . . 11
5.28 Session 28: Unit 6 – Socially efficient and inefficient market outcomes . . . 11
5.29 Session 29: Unit 6 – Externalities . . . 11
5.30 Session 30: Unit 6 – Public and private goods . . . 12
5.31 Session 31: Unit 6 – Government intervention in different market structures . . . 13
5.32 Session 32: Unit 6 – Inequality . . . 13
5.33 Session 33: Unit 6 – Market failure FRQ synthesis . . . 13
5.34 Session 34: Review – Core graphs . . . 13
5.35 Session 35: Review – Timed MCQ and error analysis . . . 13
5.36 Session 36: Review – Timed FRQ and exam readiness . . . 14

6 Materials and assessment loop **14**

7 Source and synchronization note **14**

1 Course design

This course treats AP Microeconomics as model-based reasoning. Students connect definitions to graphs, calculations, and causal explanations, then transfer those skills to MCQ and FRQ formats.

The default plan is 18 weeks with two 90-minute meetings per week. Every session has a visible student product and an objective mapped to the College Board CED.

2 Course outcomes

By the end of the course, students should be able to:

- explain scarcity, opportunity cost, comparative advantage, and the production possibilities curve;
- use demand, supply, elasticity, surplus, trade, taxes, subsidies, and price controls to explain market outcomes;
- calculate production, costs, revenue, profit, and profit-maximizing output;
- compare perfect competition, monopoly, monopolistic competition, and oligopoly;
- analyze factor markets using marginal revenue product, factor price, and monopsony models;
- evaluate externalities, public goods, common resources, inequality, efficiency, and government policy;
- produce AP-style graphs, calculations, and written explanations with correct labels, units, and causal logic.

3 Standard 90-minute lesson

Time	Phase	Student product
0–8	Retrieval warm-up	3–5 retrieval questions or an unlabeled core graph
8–20	Context and objective	A prediction and a question to answer
20–42	Mini-lesson and model	Structured notes, formula, or teacher model
42–62	Guided practice	Graph, calculation, or causal explanation
62–78	AP-style transfer	4–8 MCQs or one FRQ subpart
78–86	Review and error code	Concept, graph, calculation, reading, or expression error
86–90	Exit ticket	One conclusion and one unresolved question

4 Graphing and response routines

For every graph, students identify both axes and units, name the curve that moves, mark old and new outcomes, and state the change in price, quantity, revenue, cost, surplus, or efficiency. For every calculation, they write the relationship, substitute values with units, and state the economic meaning. For every FRQ explanation, they use a because–therefore–result chain.

5 Session-by-session design

5.1 Session 1: Unit 1 – Scarcity and resource allocation

Official Learning Objective: Define scarce resources and explain how economic systems allocate them.
Objective ID: MKT-1.A; MKT-1.B
CED PDF pages: 41–42

Focus	Scarcity and resource allocation
Student product	Use a PPF to explain one choice
Homework	Unit 1 HW: basic concepts

5.2 Session 2: Unit 1 – Production possibilities curve

Official Learning Objective: Use a PPC to explain opportunity cost, efficiency, underutilization, and growth.
Objective ID: MKT-1.C
CED PDF pages: 43

Focus	Production possibilities curve
Student product	Complete a PPF and opportunity-cost explanation
Homework	Trade-off calculation practice

5.3 Session 3: Unit 1 – Comparative advantage and trade

Official Learning Objective: Determine comparative advantage and mutually beneficial specialization and trade.
Objective ID: MKT-2.A; MKT-2.B
CED PDF pages: 44

Focus	Comparative advantage and trade
Student product	Complete a specialization and exchange table
Homework	Comparative-advantage calculations

5.4 Session 4: Unit 1 – Cost-benefit and marginal consumer choice

Official Learning Objective: Calculate costs and benefits and use marginal analysis to identify an optimal choice.
Objective ID: CBA-1.A; CBA-1.B; CBA-2.A; CBA-2.B
CED PDF pages: 45–47

Focus	Cost-benefit and marginal consumer choice
Student product	Use MB and MC to justify a decision
Homework	MCQ rationale log

5.5 Session 5: Unit 2 – Demand and supply

Official Learning Objective: Explain demand and supply and predict how incentives and technology shift behavior.
Objective ID: MKT-3.A; MKT-3.C; MKT-3.D
CED PDF pages: 53; 55

Focus	Demand and supply
Student product	Draw the initial market equilibrium
Homework	Unit 2 HW: equilibrium

5.6 Session 6: Unit 2 – Price elasticity of demand and supply

Official Learning Objective: Calculate and interpret elasticity and predict its effect on total revenue.
Objective ID: MKT-3.E
CED PDF pages: 56–58

Focus	Price elasticity of demand and supply
Student product	Calculate elasticity and classify the result
Homework	Elasticity practice

5.7 Session 7: Unit 2 – Other elasticities and total revenue

Official Learning Objective: Use income and cross-price elasticity to interpret relationships among goods and consumers.
Objective ID: MKT-3.E
CED PDF pages: 59

Focus	Other elasticities and total revenue
Student product	Use elasticity to predict total-revenue changes
Homework	MCQ plus calculation

5.8 Session 8: Unit 2 – Market equilibrium and surplus

Official Learning Objective: Identify equilibrium and calculate consumer, producer, and total surplus.
Objective ID: MKT-4.A
CED PDF pages: 60

Focus	Market equilibrium and surplus
Student product	Calculate consumer, producer, and total surplus
Homework	Surplus practice

5.9 Session 9: Unit 2 – Market disequilibrium and equilibrium changes

Official Learning Objective: Explain shortages, surpluses, and new equilibrium after a demand or supply change.
Objective ID: MKT-4.B
CED PDF pages: 61

Focus	Market disequilibrium and equilibrium changes
Student product	Classify shortage, surplus, and the new equilibrium
Homework	Shift-and-equilibrium diagrams

5.10 Session 10: Unit 2 – Government intervention

Official Learning Objective: Graph and calculate the effects of price controls, taxes, and subsidies.
Objective ID: POL-1.A
CED PDF pages: 62

Focus	Government intervention
Student product	Graph a price control, tax, or subsidy
Homework	FRQ subpart

5.11 Session 11: Unit 2 – International trade and public policy

Official Learning Objective: Explain how trade policy changes domestic outcomes and evaluate a mixed Unit 2 scenario.
Objective ID: POL-1.B
CED PDF pages: 63

Focus	International trade and public policy
Student product	Complete a timed mixed Unit 2 FRQ
Homework	Error review

5.12 Session 12: Unit 3 – The production function

Official Learning Objective: Calculate and interpret total, average, and marginal product.
Objective ID: PRD-1.A
CED PDF pages: 69

Focus	The production function
Student product	Complete a production table and identify MP
Homework	Unit 3 HW: production

5.13 Session 13: Unit 3 – Short-run production costs

Official Learning Objective: Calculate fixed, variable, total, average, and marginal costs in the short run.
Objective ID: PRD-1.A
CED PDF pages: 70

Focus	Short-run production costs
Student product	Calculate and graph the cost curves
Homework	Cost-table calculations

5.14 Session 14: Unit 3 – Long-run costs and types of profit

Official Learning Objective: Interpret long-run costs and distinguish accounting from economic profit.
Objective ID: PRD-1.A; CBA-2.C
CED PDF pages: 71–72

Focus	Long-run costs and types of profit
Student product	Interpret long-run costs and profit types
Homework	Profit comparison practice

5.15 Session 15: Unit 3 – Profit maximization

Official Learning Objective: Use marginal analysis to determine a firm's profit-maximizing output.
Objective ID: CBA-2.D
CED PDF pages: 73

Focus	Profit maximization
Student product	Use P = MR and MC to choose output
Homework	Profit-maximization questions

5.16 Session 16: Unit 3 – Produce, shut down, enter, or exit

Official Learning Objective: Explain short-run production and long-run entry or exit decisions.
Objective ID: PRD-2.A
CED PDF pages: 74

Focus	Produce, shut down, enter, or exit
Student product	Apply shutdown and entry/exit conditions
Homework	Decision classification

5.17 Session 17: Unit 3 – Perfect competition and review

Official Learning Objective: Explain how perfect competition determines market and firm outcomes.
Objective ID: PRD-3.A
CED PDF pages: 75

Focus	Perfect competition and review
Student product	Complete a cost/profit synthesis graph
Homework	Unit 3 quiz and error review

5.18 Session 18: Unit 4 – Introduction to imperfect competition

Official Learning Objective: Identify sources of market power and barriers to entry.
Objective ID: PRD-3.B
CED PDF pages: 83

Focus	Introduction to imperfect competition
Student product	Identify barriers to entry and market power
Homework	Unit 4 HW: market structures

5.19 Session 19: Unit 4 – Monopoly

Official Learning Objective: Determine monopoly output, price, profit, and efficiency using graphs.
Objective ID: PRD-3.B
CED PDF pages: 84

Focus	Monopoly
Student product	Graph monopoly output, price, and profit
Homework	Monopoly graph practice

5.20 Session 20: Unit 4 – Price discrimination

Official Learning Objective: Explain how price discrimination changes prices, output, and surplus.
Objective ID: PRD-3.B
CED PDF pages: 85

Focus	Price discrimination
Student product	Explain how price discrimination changes surplus
Homework	Case analysis and MCQ

5.21 Session 21: Unit 4 – Monopolistic competition

Official Learning Objective: Explain product differentiation and short-run and long-run monopolistic competition.
Objective ID: PRD-3.B
CED PDF pages: 86

Focus	Monopolistic competition
Student product	Compare short-run and long-run outcomes
Homework	FRQ subpart

5.22 Session 22: Unit 4 – Oligopoly and game theory

Official Learning Objective: Use a payoff table to analyze strategic behavior and equilibrium.
Objective ID: PRD-3.C
CED PDF pages: 87

Focus	Oligopoly and game theory
Student product	Complete a payoff table and equilibrium explanation
Homework	Unit 4 quiz

5.23 Session 23: Unit 4 – Market structure review

Official Learning Objective: Compare imperfect market structures by power, behavior, and efficiency.
Objective ID: PRD-3.B; PRD-3.C
CED PDF pages: 83–87

Focus	Market structure review
Student product	Compare imperfect market structures
Homework	Mixed market-structure review

5.24 Session 24: Unit 5 – Introduction to factor markets

Official Learning Objective: Explain factor prices, derived demand, and hiring decisions.
Objective ID: PRD-4.A
CED PDF pages: 95

Focus	Introduction to factor markets
Student product	Derive MRP from the product market
Homework	Unit 5 HW

5.25 Session 25: Unit 5 – Changes in factor demand and factor supply

Official Learning Objective: Predict how productivity, output price, and labor-supply determinants shift factor markets.
Objective ID: PRD-4.B
CED PDF pages: 96

Focus	Changes in factor demand and factor supply
Student product	Graph a factor-market shift
Homework	Wage and employment calculations

5.26 Session 26: Unit 5 – Competitive factor markets

Official Learning Objective: Use MRP and the factor price to determine profit-maximizing input use.
Objective ID: PRD-4.C
CED PDF pages: 97–98

Focus	Competitive factor markets
Student product	Use MRP and factor price to choose input use
Homework	Factor-market FRQ

5.27 Session 27: Unit 5 – Monopsony and review

Official Learning Objective: Explain monopsony employment and wage outcomes and compare them with competition.
Objective ID: PRD-4.D
CED PDF pages: 99

Focus	Monopsony and review
Student product	Compare monopsony and competitive outcomes
Homework	Unit 5 synthesis

5.28 Session 28: Unit 6 – Socially efficient and inefficient market outcomes

Official Learning Objective: Identify efficient quantity and explain how private incentives create inefficiency and DWL.
Objective ID: POL-2.A; POL-2.B
CED PDF pages: 105–106

Focus	Socially efficient and inefficient market outcomes
Student product	Identify the efficient quantity and DWL
Homework	Unit 6 HW

5.29 Session 29: Unit 6 – Externalities

Official Learning Objective: Graph private and social costs or benefits and evaluate corrective policies.
Objective ID: POL-3.A; POL-3.B
CED PDF pages: 107

Focus	Externalities
Student product	Graph private and social costs or benefits
Homework	Policy comparison

5.30 Session 30: Unit 6 – Public and private goods

Official Learning Objective: Classify goods and explain free riding and common-resource overuse.
Objective ID: POL-3.C
CED PDF pages: 108

Focus	Public and private goods
Student product	Classify goods and explain free riding
Homework	Classification practice

5.31 Session 31: Unit 6 – Government intervention in different market structures

Official Learning Objective: Calculate and evaluate policy effects in competitive and imperfect markets.
Objective ID: POL-4.A
CED PDF pages: 109–110

Focus	Government intervention in different market structures
Student product	Evaluate a policy in a market-structure case
Homework	MCQ practice

5.32 Session 32: Unit 6 – Inequality

Official Learning Objective: Define inequality measures and explain sources of income and wealth inequality.
Objective ID: POL-5.A; POL-5.B
CED PDF pages: 111

Focus	Inequality
Student product	Explain an inequality measure and its causes
Homework	FRQ subpart

5.33 Session 33: Unit 6 – Market failure FRQ synthesis

Official Learning Objective: Integrate graphs, calculations, and policy explanations in a market-failure FRQ.
Objective ID: POL-2.A; POL-2.B; POL-3.A; POL-3.B; POL-3.C; POL-4.A; POL-5.A; POL-5.B
CED PDF pages: 105–111

Focus	Market failure FRQ synthesis
Student product	Complete a timed market-failure FRQ
Homework	Unit 6 quiz and error review

5.34 Session 34: Review – Core graphs

Official Learning Objective: Draw and interpret the major AP Microeconomics graphs with complete labels.
Objective ID: MKT-1.C; MKT-4.A; PRD-1.A; PRD-2.A; PRD-3.A; PRD-3.B; PRD-4.C; PRD-4.D; POL-3.A; POL-4.A
CED PDF pages: CED pp. 166–173

Focus	Core graphs
Student product	Draw and interpret six core AP Micro graphs
Homework	Graph error table

5.35 Session 35: Review – Timed MCQ and error analysis

Official Learning Objective: Use course concepts, calculations, graphs, and interpretation under time pressure.
Objective ID: All course skills
CED PDF pages: CED pp. 15–19

Focus	Timed MCQ and error analysis
Student product	Complete and classify a timed MCQ set
Homework	Targeted follow-up practice

5.36 Session 36: Review – Timed FRQ and exam readiness

Official Learning Objective: Produce a complete FRQ response with accurate graphs, calculations, and causal explanations.
Objective ID: All course skills
CED PDF pages: CED pp. 15–19; 166–173

Focus	Timed FRQ and exam readiness
Student product	Complete a full or half FRQ set
Homework	Exam-readiness plan

6 Materials and assessment loop

Use the official CED and course documents to set the content boundary, the local FRQ archive for scored writing practice, the local Unit HW collection for repetition, and the open resources for supplementary explanations and problem sets. Restricted College Board MCQ stays in AP Classroom or Bluebook and is accessed through the official route.

The recurring assessment loop is retrieval, graph or calculation practice, one AP-style transfer item, error coding, and a delayed reattempt. The error log distinguishes concept, graph, calculation, reading, and expression errors.

7 Source and synchronization note

The objective IDs and CED pages come from `official-learning-objectives.csv` and `session-learning-objectives`. The Markdown schedule is generated from the same session table. The source CED is stored at `APMICRO-MCQ-Practice/college-board-ap-microeconomics-course-and-exam-description.pdf`.
