(A) money available to start a business
(B) stocks and bonds issued by businesses to raise funds
(C) financial investment of businesses
(D) currency in circulation and deposits in financial institutions
(E) tools and machinery used to produce goods and services

3. Which of the following is necessary in a well-functioning capitalist economy but not in a command economy?

(A) Centralized decision making
(B) Scarcity of resources
(C) Monopolies
(D) Protection of property rights
(E) Positive externalities

4. Which of the following is associated with a command economy?

(A) Competitive product markets
(B) Use of resources for private gain
(C) Use of available resources to meet all the needs and wants of its citizens
(D) Entry of firms into industries with economic profit
(E) Public ownership of the means of production

5. Assume there are two goods in a market economy. The amount of each good produced is determined by

(A) buyers and sellers' interactions in the market for each good
(B) a central planning agency
(C) the desires of households only
(D) each citizen's minimum needs for survival
(E) popular voting with one vote per citizen

6. A difference between command and market economic systems is that command economic systems

(A) have a legal system that provides incentives to produce, whereas market economic systems do not
(B) ensure efficiency, whereas market economic systems ensure equity
(C) limit individual property rights, whereas market economic systems protect individual property rights
(D) maximize producer and consumer surplus, whereas market economic systems do not
(E) regulate production but not distribution, whereas market economic systems regulate both production and distribution

1.2 economic system

7. Command economies differ from capitalist economies mainly because of which of the following?

(A) Command economies have higher prices for oil.

(B) Capitalist economies have higher prices for oil.

(C) Command economies have higher degree of government ownership of resources.

(D) Capitalist economies have higher degree of government ownership of resources.

(E) Command economies rely on prices to allocate resources.

8. Which of the following is true in a command economy?

(A) There is more private ownership of the factors of production than in a market economy.

(B) Production decisions are based on the incentive of firms to maximize profits.

(C) The government directs the use of factors of production.

(D) The price system is used to allocate resources.

(E) There is more freedom of enterprise than in a market economy.

9. In contrast to a market economy, a command economy relies on which of the following?

(A) The private sector in deciding what goods will be produced

(B) Private ownership of resources

(C) Profits as incentives to make choices

(D) The government to allocate resources

(E) Supply and demand to determine prices

10. Which of the following economic systems primarily relies on prices for allocating resources and goods?

(A) Free-market

(B) Traditional

(C) Command

(D) Mixed

(E) Socialism

11. In a command economy, the quantity of computers produced would be determined by

(A) factory owners

(B) the government

(C) consumers and producers

(D) international trade

(E) the wealthy

12. Compared to a market economy, in a command economy there is greater

(A) government involvement in the allocation of resources

(B) protection of private property rights

(C) reliance on prices for allocating scarce resources

(D) reliance on private businesses for the allocation of resources and distribution of goods

(E) consumption of consumer goods

1.2 economic system

13. A power company decides to use wind turbines to provide electricity instead of coal. Which basic economic question does this decision answer in a free market economy?

(A) What goods or services will be produced?

(B) How will goods or services be produced?

(C) Who will consume the goods or services?

(D) What economic system should be adopted?

(E) Who gets to decide?

14. Which of the following is a defining characteristic of a market economy?

(A) Private ownership of resources

(B) Equitable distribution of income

(C) Taxation of personal income

(D) Reliance on public goods

(E) Government-guided resource allocation

15. The fundamental difference between a market economy and a command economy lies in which of the following?

(A) Property rights and protection of private property

(B) Absolute and comparative advantages

(C) Specialization and trade

(D) Taxes and subsidies

(E) Positive and negative externalities

16. The government imposition of a minimum wage in a perfectly competitive labor market is a policy that would

(A) be used in a pure market economy

(B) be used in a mixed economy

(C) eliminate deadweight loss

(D) increase the number of workers hired

(E) decrease the supply of labor

17. Which of the following is true in a capitalist economy?

(A) The factors of production are collectively owned.

(B) The factors of production are distributed according to needs.

(C) The prices of goods and services are usually determined by the government.

(D) The prices of goods and services are set so that an equitable distribution of private property is achieved.

(E) Prices serve as incentives for factors of production to move to the markets where they are most valued.

18. Relative to a command economy, resources in a market economy are more commonly allocated by

(A) democratic elections

(B) government planning

(C) the price system

(D) established traditions

(E) a system of checks and balances

1.2 economic system

19. Individual private property rights provide people incentives to

(A) meet societal goals rather than pursue their own self-interest

(B) produce goods and services regardless of market demand

(C) achieve equitable distribution of goods and services through competitive markets

(D) focus only on benefits without regard to costs

(E) produce goods and services that are valued in markets

20. The allocation of resources in a market economy is described by which of the following statements?

I. The government decides which goods will be produced and which consumers will receive them.

II. Buyers and sellers exchange goods and services on a voluntary basis.

III. Prices and costs help producers decide whether they are producing too little or too much of a good.

(A) I only.

(B) II only.

(C) III only.

(D) I and III only.

(E) II and III only.
